

Animal Husbandry and its Administration

Programme course

6 credits

Djurhållning och förvaltning

NBIB39

Valid from: 2017 Spring semester

Determined by

Board of Studies for Chemistry, Biology
and Biotechnology

Date determined

2017-01-25

Main field of study

Biology

Course level

First cycle

Advancement level

G1X

Course offered for

- Biology

Entry requirements

Note: Admission requirements for non-programme students usually also include admission requirements for the programme and threshold requirements for progression within the programme, or corresponding.

Prerequisites

Knowledge of zoology, including physiology, corresponding to the courses included in the candidate program

Intended learning outcomes

The course will provide an overview of practical husbandry in different fields. After completing the course students should have conceptual knowledge of various forms of animal husbandry, eg in agriculture, zoos, animal trade and laboratories, as well as practical insights into everyday work livestock production. Furthermore, the students have a good understanding of the laws and regulations governing livestock production, as well the community control that ensures that regulations are followed.

Course content

Husbandry in theory and practice in agriculture, zoos, animal trade and laboratory animals. Animal welfare legislation, management and control.

Teaching and working methods

During the course, students will spend part of the course experiencing practical work in different husbandry systems, where they will get familiar with daily tasks. Examples of this might be participating in the daily work on a farm, or practical involvement in laboratory animal care. Furthermore, the students get in seminar form the relevant regulations and legal texts. Through lectures and field trips, the students study a good idea of the various authorities in control of animal welfare issues, as well as various professional groups and their role in monitoring activities.

Examination

PRA1	Seminar	3 credits	U, G
UPG1	Seminars and assignments	3 credits	U, G

Grades are given as 'Fail' or 'Pass'.

Grades

Two-grade scale, U, G

Department

Institutionen för fysik, kemi och biologi

Director of Studies or equivalent

Agneta Johansson

Examiner

Per Jensen

Course website and other links

Education components

Preliminary scheduled hours: 92 h

Recommended self-study hours: 68 h

Course literature

Lagtexter och förordningar, som utdelas. Vetenskapliga artiklar, som utdelas.

Common rules

Regulations (apply to LiU in its entirety)

The university is a government agency whose operations are regulated by legislation and ordinances, which include the Higher Education Act and the Higher Education Ordinance. In addition to legislation and ordinances, operations are subject to several policy documents. The Linköping University rule book collects currently valid decisions of a regulatory nature taken by the university board, the vice-chancellor and faculty/department boards.

LiU's rule book for education at first-cycle and second-cycle levels is available at http://stydokument.liu.se/Regelsamling/Innehall/Utbildning_pa_grund-_och_avancerad_niva.
