

# Introduction to Computer Programming

Programme course

8 credits

Programmering, grundkurs

TDDE44

Valid from: 2019 Spring semester

**Determined by**

Board of Studies for Electrical  
Engineering, Physics and Mathematics

**Date determined**

2018-08-31

## Main field of study

Computer Science and Engineering, Computer Science

## Course level

First cycle

## Advancement level

G1X

## Course offered for

- Master of Science in Applied Physics and Electrical Engineering
- Master of Science in Biomedical Engineering
- Bachelor's Programme in Mathematics

## Entry requirements

Note: Admission requirements for non-programme students usually also include admission requirements for the programme and threshold requirements for progression within the programme, or corresponding.

## Prerequisites

Basic computer skills.

## Intended learning outcomes

The intended purpose of this course is to facilitate and provide students with fundamental skills and knowledge pertaining to computer programming and an introduction to Computer Science. After having completed the course, the student should be able to:

- Make use of the computing environment for tasks related to programming and building basic programs
- Explain fundamental concepts related to computer science, programming, and programming languages
- Solve programming related problems by applying an interactive approach to implementation, testing and troubleshooting
- Construct abstractions using varying degree of support provided by the programming language
- Solve programming problems by breaking them down into smaller sub-problems
- Construct recursive and iterative algorithms

## Course content

- A general introduction to Computer Science
- Programming fundamentals: expressions, basic datatypes, variables, functions, control structures, file management, file formats, modules
- The Python programming language
- Use of open data resources from the web
- Interactive and incremental program development
- Testing and troubleshooting
- Programming paradigms: functional, imperative and object-oriented programming
- Abstraction: Data and program abstraction

## Teaching and working methods

The course consists of lectures, tutorials and laboratory sessions. Concepts and their applications are treated during lectures and tutorials. Practical skills and abilities are practiced during laboratory sessions by solving programming exercises. The course setup requires a high degree of student activity and that students engage in private studies outside of the scheduled classes.

## Examination

LAB2	Data and program abstraction/intro to object-oriented programming	3 credits	U, G
LAB1	Fundamentals in programming and computer system	3 credits	U, G
DAT1	Computer examination	2 credits	U, 3, 4, 5

## Grades

Four-grade scale, LiU, U, 3, 4, 5

## Other information

Supplementary courses: Programming - data structures and algorithms. Data and program structures.

## Department

Institutionen för datavetenskap

## Director of Studies or equivalent

Jalal Maleki

## Examiner

Jody Foo

## Course website and other links

<http://www.ida.liu.se/>

## Education components

Preliminary scheduled hours: 66 h

Recommended self-study hours: 147 h

## Course literature
