

Management Control

Programme course

6 credits

Ekonomisk styrning

TDEI19

Valid from: 2017 Spring semester

Determined by
Board of Studies for Industrial
Engineering and Logistics

Date determined
2017-01-25

Main field of study

Industrial Engineering and Management

Course level

Second cycle

Advancement level

A1X

Course offered for

- Computer Science and Engineering, M Sc in Engineering
- Industrial Engineering and Management - International, M Sc in Engineering
- Industrial Engineering and Management, M Sc in Engineering
- Information Technology, M Sc in Engineering
- Computer Science and Software Engineering, M Sc in Engineering

Entry requirements

Note: Admission requirements for non-programme students usually also include admission requirements for the programme and threshold requirements for progression within the programme, or corresponding.

Prerequisites

Basic knowledge regarding management control.

Intended learning outcomes

After the course is completed the student should have:

- developed an understanding of how organisations can be managed.
- be able to evaluate how the behaviour in an organisation is affected through different kind of management control
- be able to analyse management control systems in different contexts and suggest how the systems should be designed and used.

Course content

The following themes will be discussed:

- Basic concepts and models
- Traditional vs. modern management control
- Responsibility centres
- Transfer prices
- Strategic planning, budgeting and follow-up
- Performance management
- Corporate governance, internal control and risk management
- Social Return on Investment

Teaching and working methods

In this course the focus is on how management control systems are designed and used in order to formulate and implement strategies. The course consists of several themes (see below). Every theme is introduced through a lecture, and some of the are used as the theme for case studies.

Examination

UPG2	Case Seminars	1 credits	U, G
UPG1	Assignment	2 credits	U, 3, 4, 5
KTR1	Written examination	3 credits	U, 3, 4, 5

The grade is given as a combination of the written examination and the hand-in assignment, but will only be given after the cases are completed and given the grade "G".

Grades

Four-grade scale, LiU, U, 3, 4, 5

Other information

Supplementary courses:

Strategy and management control.

Department

Institutionen för ekonomisk och industriell utveckling

Director of Studies or equivalent

Johan Holtström

Examiner

Carl-Johan Petri

Common rules

Regulations (apply to LiU in its entirety)

The university is a government agency whose operations are regulated by legislation and ordinances, which include the Higher Education Act and the Higher Education Ordinance. In addition to legislation and ordinances, operations are subject to several policy documents. The Linköping University rule book collects currently valid decisions of a regulatory nature taken by the university board, the vice-chancellor and faculty/department boards.

LiU's rule book for education at first-cycle and second-cycle levels is available at http://stydokument.liu.se/Regelsamling/Innehall/Utbildning_pa_grund-_och_avancerad_niva.
