

CAD and Machine Elements

Programme course

6 credits

CAD och maskinelement

TMKT14

Valid from: 2017 Spring semester

Determined by

Board of Studies for Industrial
Engineering and Logistics

Date determined

2017-01-25

Offered for the last time

Spring semester 2019

Replaced by

TMKT94

Main field of study

Mechanical Engineering

Course level

First cycle

Advancement level

G2X

Course offered for

- Industrial Engineering and Management - International, M Sc in Engineering
- Industrial Engineering and Management, M Sc in Engineering

Entry requirements

Note: Admission requirements for non-programme students usually also include admission requirements for the programme and threshold requirements for progression within the programme, or corresponding.

Prerequisites

Engineering mechanics and Strength of materials.

Intended learning outcomes

The course introduces the student to the field of machine design, where drawing technique, CAD and machine elements are core disciplines. After the course, the students are expected to be able to:

- perform basic technical drawings.
- perform basic modelling tasks using an advanced CAD system.
- show basic knowledge about, and ability to perform basic analyse of common machine elements.

Course content

The foundations of engineering drawing. Introduction to computer-based drawing- and design-tools. Introduction to Machine elements, bolted joints, springs, fluid-film bearings, rolling element bearings and spur gear transmissions, etc.

Teaching and working methods

The course is taught in lectures, lessons and laboratory exercises

Examination

LAB3	Laboratory work	0.5 credits	U, G
TEN1	Written Examination	3 credits	U, 3, 4, 5
LAB2	Exercise	1.5 credits	U, G
UPG3	Drawing exercises	1 credits	U, G

Grades

Four-grade scale, LiU, U, 3, 4, 5

Department

Institutionen för ekonomisk och industriell utveckling

Director of Studies or equivalent

Peter Hallberg

Examiner

Peter Hallberg

Common rules

Regulations (apply to LiU in its entirety)

The university is a government agency whose operations are regulated by legislation and ordinances, which include the Higher Education Act and the Higher Education Ordinance. In addition to legislation and ordinances, operations are subject to several policy documents. The Linköping University rule book collects currently valid decisions of a regulatory nature taken by the university board, the vice-chancellor and faculty/department boards.

LiU's rule book for education at first-cycle and second-cycle levels is available at http://stydokument.liu.se/Regelsamling/Innehall/Utbildning_pa_grund-_och_avancerad_niva.
