

## Digital Forensics and Incident Response

Digital forensik och incidentrespons  
6 credits

Programme course

TSIT14

Valid from: 2025 Spring semester

<b>Determined by</b>	<b>Main field of study</b>	
Board of Studies for Computer Science and Media Technology	Information Technology, Computer Science and Engineering, Computer Science	
<b>Date determined</b>	<b>Course level</b>	<b>Progressive specialisation</b>
2024-08-28	Second cycle	A1F
<b>Revised by</b>	<b>Disciplinary domain</b>	
	Technology	
<b>Revision date</b>	<b>Subject group</b>	
	Computer Technology	
<b>Offered first time</b>	<b>Offered for the last time</b>	
Autumn semester 2024		
<b>Department</b>	<b>Replaced by</b>	
Institutionen för systemteknik		

## Course offered for

- Master of Science in Information Technology
- Master of Science in Computer Science and Software Engineering
- Master of Science in Computer Science and Engineering
- Master's Programme in Cybersecurity

## Prerequisites

Computer networks, Ethical hacking

## Intended learning outcomes

The course covers the basic requirements, methodologies, and limitations of digital forensics and incident response, including techniques for identifying, securing, and evaluating digital evidence in various systems.

After completing the course, the student is expected to:

- Comprehend and explain the fundamental theories and principles of digital forensics and incident response.
- Comprehend and describe methodologies, challenges, and tools used in digital forensics and incident response across various systems.
- Implement, evaluate and document forensic investigations by interpreting digital evidence and utilizing forensic tools.

## Course content

During the course the following subjects will be included:

- Network forensics
- Incident response
- Digital forensics on hardware
- Mobile forensics
- Memory forensics
- Forensics on image and video
- Log management, preserving evidence
- Particulars of SCADA environments and critical infrastructure
- Theoretical models
- Advanced and narrow topics, e.g., adversary simulation
- Laws and use of digital forensic material as evidence

## Teaching and working methods

The course consists of lectures and a series of laborations

## Examination

LAB1	Laboratory work	4 credits	U, G
TEN1	Written examination	2 credits	U, 3, 4, 5

## Grades

Four-grade scale, LiU, U, 3, 4, 5

## Other information

### About teaching and examination language

The teaching language is presented in the Overview tab for each course. The examination language relates to the teaching language as follows:

- If teaching language is “Swedish”, the course as a whole could be given in Swedish, or partly in English. Examination language is Swedish, but parts of the examination can be in English.
- If teaching language is “English”, the course as a whole is taught in English. Examination language is English.
- If teaching language is “Swedish/English”, the course as a whole will be taught in English if students without prior knowledge of the Swedish language participate. Examination language is Swedish or English depending on teaching language.

### Other

The course is conducted in such a way that there are equal opportunities with regard to sex, transgender identity or expression, ethnicity, religion or other belief, disability, sexual orientation and age.

The planning and implementation of a course should correspond to the course syllabus. The course evaluation should therefore be conducted with the course syllabus as a starting point.

The course is campus-based at the location specified for the course, unless otherwise stated under “Teaching and working methods”. Please note, in a campus-based course occasional remote sessions could be included.
