and

Mathematics and Social Studies corresponding to the level in Swedish upper
secondary education (Matematik 3b/3c, Samhällskunskap 1b/(1a1 and 1a2)

and

English and French corresponding to the level of English and Spanish in Swedish
upper secondary education (Engelska 6 and Spanska 3)

Intended learning outcomes

The general aim of the course is that the student should develop a basic communicative ability in Spanish. This is made in a context where the student develops basic knowledge of Spanish-speaking social systems with an emphasis on the legal and market policy conditions for companies, as well as economic and financial information.

On completion of the course, the students should, in speech and writing, and with such precise language that it can be understood and accepted by a person in the Spanish language area, be able to

- describe the legal and market policy conditions for companies in Spain
- describe companies' economic and financial information in their country/language area
- identify and discuss differences and similarities in these conditions and economic information in relation to Swedish conditions.

Course content

The course builds on the introductory language course Communicate in Spanish 1. Through the study of documents with primarily social and economic contents, the linguistic communication ability is trained towards more linguistic precision in a context that is relevant for the education as a whole. The course contents are related, among other things, to the previous courses within the programme in the field of economics: Organization, Microeconomics, Commercial and Business Law I, Financial Accounting and Management Control.

Teaching and working methods

Lectures and seminars

Examination

The course is examined through

- Project work. 4.5 HE credits
- Written examination. 4.5 HE credits

Students failing an exam covering either the entire course or part of the course twice are entitled to have a new examiner appointed for the reexamination.

Students who have passed an examination may not retake it in order to improve their grades.

Grades

Three-grade scale, U, G, VG

Other information

Planning and implementation of a course must take its starting point in the wording of the syllabus. The course evaluation included in each course must therefore take up the question how well the course agrees with the syllabus.

The course is carried out in such a way that both men's and women's experience and knowledge is made visible and developed.
