Intended learning outcomes

Knowledge and understanding:

After having successfully completed the course the student should, on an advanced level, be able to:

- Synthesize knowledge about entrepreneurship and organizational change gained through reading, discussions, experiences and cases, and express it orally and in writing
- Critically and independently discuss classic and contemporary research on entrepreneurship and its connection to organizational change
- Describe critical issues within the theoretical field of entrepreneurship and organizational change, and position them in relation to each other, and to related fields
- Understand and discuss the prerequisites for organizational change through entrepreneurship in private as well as public and non-profit contexts
- Understand and discuss the prerequisites for organizational change through entrepreneurship in different regions of the world, as well as the role of globalization

Skills and abilities:

After having successfully completed the course the student should, on an advanced level, be able to:

- Analyze complex entrepreneurial processes in various context, identify problems and discuss solutions
- Critically and independently discuss the discourse on entrepreneurship and change

Values and attitudes:

After having successfully completed the course the student should have developed a critical and reflective attitude towards what they read and experienced within the fields of entrepreneurship and organizational change.

Course content

The aim of the course is to deepen and widen the student's knowledge and understanding about entrepreneurship and its role for organizational change.

Students will learn about organizational perspectives on entrepreneurship, as well as entrepreneurship perspectives on organizations. Classic as well as contemporary views on entrepreneurship and organizational change are elaborated in the course, as well as organizational change and entrepreneurship in different sectoral and national contexts. We will go into depth in for example the following areas;

- Entrepreneurship as means and ends for organizational and structural change in western economies and on emerging markets in the global economy.
- The societal construction of entrepreneurship vs diversity and change in organizations.
- Intrapreneurship and Employee-Driven-Innovation (EDI) vs managed change.
- Methodologies for understanding and supporting entrepreneurship and organizational change on different levels of analysis.

Teaching and working methods

Students will learn through reading and reflecting on articles and books from different perspectives, as well as through seminars, lectures, guest-lectures and team assignments. Students are responsible for their own learning process, and lectures provide perspectives on the course content, thus giving an opportunity for students to facilitate the process of structuring the course content. Students have to prepare tasks and assignments for seminars and work individually and in teams. Language of instruction is Swedish.

Examination

The course content is examined continuously during the course, through group assignments reported in writing and orally during seminars, as well as through a written individual examination at the end of the course.

Students failing an exam covering either the entire course or part of the course twice are entitled to have a new examiner appointed for the reexamination.

Students who have passed an examination may not retake it in order to improve their grades.

Grades

Three-grade scale, U, G, VG

Other information

Planning and implementation of a course must take its starting point in the wording of the syllabus. The course evaluation included in each course must therefore take up the question how well the course agrees with the syllabus.

The course is carried out in such a way that both men's and women's experience and knowledge is made visible and developed.
