G1X

## Course offered for

- Master Programme in IT and Management
- Bachelor programme in Information Systems Analysis
- Business and Economics Programme - International - French
- Business and Economics Programme
- Business and Economics Programme - International - Spanish
- Business and Economics Programme - International - German

## Entry requirements

The general admission requirements as for the programme.

## Intended learning outcomes

After completion of the course the student should be able to:

- account for contemporary and classic theories on entrepreneurship
- account for the historical development of thoughts in the field of entrepreneurship
- criticize theories on entrepreneurship
- describe critical issues within the field of entrepreneurship in relation to related theoretical fields
- develop and refine an idea into a business plan
- make informed choices in developing plans and strategies for entrepreneurial ventures in different organizational contexts
- identify problems inherent in the creation of a new organization

## Course content

The aim of the course is to deepen and widen the student's knowledge and understanding about entrepreneurship, from a theoretical as well as a more practical point of view. Students will learn about perspectives on entrepreneurship, as well as requirements and pre-conditions for entrepreneurship in different organizational contexts.

The course content is based on three submodules:

- The development of the field of entrepreneurship and approaches to entrepreneurship is discussed
- The private context of entrepreneurship is focused, the development of venture plans are discussed as well as analysis of the marketplace and competitive advantages
- Intrapreneurship and entrepreneurship in the public and non-profit contexts are focused, as well as strategies used by entrepreneurs in such contexts

## Teaching and working methods

Students will learn through lectures, seminars and team work. Students are responsible for their own learning process, and lectures provide perspectives on the course content, thus giving an opportunity for students to facilitate the process of structuring the course content. Students may have to prepare tasks and assignments for seminars and team work. Language of instructions: English.

## Examination

The course content will be examined through participation in team work, seminars, project work and a written examination. Detailed information about the examination can be found in the course's study guide.

Students failing an exam covering either the entire course or part of the course twice are entitled to have a new examiner appointed for the reexamination.

Students who have passed an examination may not retake it in order to improve their grades.

## Grades

Three-grade scale, U, G, VG

## Other information

Planning and implementation of a course must take its starting point in the wording of the syllabus. The course evaluation included in each course must therefore take up the question how well the course agrees with the syllabus.

The course is carried out in such a way that both men's and women's experience and knowledge is made visible and developed.
