

Co-creating Digital Solutions and Automation

Samskapande av digitala lösningar

7.5 credits

Programme course

726G33

Valid from: 2024 Autumn semester

Determined by	Main field of study	
Course and Programme Syllabus Board at the Faculty of Arts and Sciences	Information Systems	
Date determined	Course level	Progressive specialisation
2024-04-09	First cycle	G2F
Revised by	Disciplinary domain	
	Social sciences	
Revision date	Subject group	
	Informatics/Computer and Systems Sciences	
Offered first time	Offered for the last time	
Autumn semester 2024		
Department	Replaced by	
Institutionen för ekonomisk och industriell utveckling		

Course offered for

- Master Programme in IT and Management
- Bachelor's programme in Information Systems Analysis

Entry requirements

General entry requirements for undergraduate studies
and

Social Studies and Mathematics corresponding to the level in Swedish upper
secondary education (Samhällskunskap 1b or 1a1 and 1a2 and Matematik
2a/2b/2c)

and

at least 95 ECTS credits from year 1 and 2 on the Bachelor's programme in
Information Systems Analysis

Intended learning outcomes

On completion of the course, the student should be able to:

- identify and explain different perspectives on co-creation and responsible innovation
- apply co-creation as an approach to the design of digital solutions and automation
- apply concepts from Science and Technology Studies (STS) in the co-creation of digital solutions
- critically analyze the societal impact of digital solutions and automation
- assess the value of including external users in the design and testing of digital solutions and automation

Course content

The course aims to introduce the student to theories and concepts from social sciences with a focus on Science and Technology Studies (STS), such as Actor Network Theory (ANT), Social Construction of Technology (SCoT), Agential Realism and Sociotechnical Imaginaries (STIs). The course covers how these can be used for co-creation and in the design and testing of digital solutions and automation. The course also covers the effects of digital technologies and automation on a societal level with a focus on responsible innovation.

Teaching and working methods

The teaching consists of lectures, workshops, seminars, supervision and project work. In addition, the student should conduct self-study.

Teaching and examination language: English

Examination

The course is examined through:

- individual written essay, grading scale: UV
- written group project, grading scale: UG
- active participation in seminars: UG
- active participation in workshops: UG

For a final grade of G (Pass), at least G (Pass) is required in all examinations.

For a final grade of VG (Pass with distinction), in addition to the requirements for G, a grade of VG is required in the individually written essay.

Detailed information can be found in the study guide.

If special circumstances prevail, and if it is possible with consideration of the nature of the compulsory component, the examiner may decide to replace the compulsory component with another equivalent component.

If the LiU coordinator for students with disabilities has granted a student the right to an adapted examination for a written examination in an examination hall, the student has the right to it.

If the coordinator has recommended for the student an adapted examination or alternative form of examination, the examiner may grant this if the examiner assesses that it is possible, based on consideration of the course objectives.

An examiner may also decide that an adapted examination or alternative form of examination if the examiner assessed that special circumstances prevail, and the examiner assesses that it is possible while maintaining the objectives of the course.

Students failing an exam covering either the entire course or part of the course twice are entitled to have a new examiner appointed for the reexamination.

Students who have passed an examination may not retake it in order to improve their grades.

Grades

Three-grade scale, U, G, VG

Other information

Planning and implementation of a course must take its starting point in the wording of the syllabus. The course evaluation included in each course must therefore take up the question how well the course agrees with the syllabus.

The course is conducted in such a way that there are equal opportunities with regard to sex, transgender identity or expression, ethnicity, religion or other belief, disability, sexual orientation and age.

If special circumstances prevail, the vice-chancellor may in a special decision specify the preconditions for temporary deviations from this course syllabus, and delegate the right to take such decisions.
