

# **Econometrics**

Single subject and programme course

7.5 credits

Ekonometri

730G99

Valid from:

**Determined by** 

The Quality Board at the Faculty of Arts and Sciences

**Date determined** 

2015-03-13

**Revision date** 2015-09-21

# Main field of study

Economics, Business Administration, Statistics

### Course level

First cycle

### Advancement level

G<sub>1</sub>X

### Course offered for

- Business and Economics Programme International French
- Business and Economics Programme
- Business and Economics Programme International Spanish
- Business and Economics Programme International German
- Bachelor's Programme in Political science and economics

### **Entry requirements**

Completed Economics, basic course comprising 30 ECTS credits with at least 15 ECTS credits approved, or the equivalent.

## Intended learning outcomes

On completion of the course, the student should be able to

- account for basic econometric model formulations and the implications of different underlying model assumptions
- account for the most commonly occurring estimation methods and for how different model formulations and characteristics of various types of data influence choice of estimation method
- interpret the results of implemented estimates of both micro and macroeconomic models and test different hypotheses with relevance to the models that have been taxed

#### Course content

The course contains the following parts:

- The classical linear regression model and different abnormalities from this model
- Estimation methods for linear regression models
- Properties at various types of data
- models of discrete choices
- Simultaneous equation systems
- Hypothesis testing for deviations from underlying model assumptions and for occurrence of different economic relationships
- Computer exercises

# Teaching and working methods

The teaching takes the form of lectures and computer exercises. The students should also study independently.

#### **Examination**

Final written examination. Written assignments in the form of computer exercises. Detailed information can be found in the study guide.

Students failing an exam covering either the entire course or part of the course twice are entitled to have a new examiner appointed for the reexamination.

Students who have passed an examination may not retake it in order to improve their grades.

#### Grades

Three-grade scale, U, G, VG

#### Other information

Planning and implementation of a course must take its starting point in the wording of the syllabus. The course evaluation included in each course must therefore take up the question how well the course agrees with the syllabus.

The course is carried out in such a way that both men's and women's experience and knowledge is made visible and developed.
