

Data Mining Project

Single subject and programme course

6 credits

Data Mining Project

732A65

Valid from: 2017 Autumn semester

Determined by

Course and Programme Syllabus Board
at the Faculty of Arts and Sciences

Date determined

2018-04-23

Replaced by

732A76

Main field of study

Statistics

Course level

Second cycle

Advancement level

A1N

Course offered for

- Master's Programme in Statistics and Data Mining

Specific information

The course is disused. Offered for the last time Autumn semester 2017. Replaced by 732A76.

Examination is offered on a total of at least five occasions for each examination component.

These occasions should be distributed across at least two semesters following the final ordinary course instance. These can be found in the course's last course room in Lisam.

Contact the department to access the course room.

Entry requirements

A bachelor's degree in one of the following subjects: statistics, mathematics, applied mathematics, computer science, engineering, or equivalent. Completed courses in calculus, linear algebra, statistics and programming are required. Documented knowledge of English equivalent to Engelska B/Engelska 6. Courses in Data Mining or Machine Learning covering at least 15 ECTS are also required.

Intended learning outcomes

After completion of the course, the student should at an advanced level be able to

- apply in the field of data mining or machine learning in a real setting
- plan, perform and report on an individual task
- discuss research and development work in machine learning or related areas

Course content

The content of the course is adapted to the problem addressed. The student joins an ongoing project or research in data mining or machine learning and studies the origin of the problem and the research related to the it, and analyzes the given problem by using methods and tools from data mining or machine learning.

Teaching and working methods

The work is performed individually with support and guidance of a supervisor.
Language of instruction: English.

Examination

The course is examined by written project reports, and a final oral examination. Detailed information about the examination can be found in the course's study guide.

Students failing an exam covering either the entire course or part of the course twice are entitled to have a new examiner appointed for the reexamination.

Students who have passed an examination may not retake it in order to improve their grades.

Grades

ECTS, EC

Other information

Planning and implementation of a course must take its starting point in the wording of the syllabus. The course evaluation included in each course must therefore take up the question how well the course agrees with the syllabus.

The course is carried out in such a way that both men's and women's experience and knowledge is made visible and developed.
