## Main field of study

Commercial Law

## Course level

First cycle

## Advancement level

G1X

## Course offered for

- Bachelor's Programme in Commercial and Business Law
- Bachelor's Programme in Commercial and Business Law with focus on Europe, French
- Bachelor's Programme in Commercial and Business Law with focus on Europe, German

## Entry requirements

The entry requirements that apply for admission to Commercial and Business Law Programme or the Commercial and Business Law Programme with Focus on Europe must be satisfied. Furthermore, the student should have completed the following courses (or the equivalent); Commercial and Business Law and Public and EU/EC Law and Contract, Tort and Insurance Law.

## Intended learning outcomes

On completion of the course, the student should be able to

- demonstrate knowledge of intellectual property rights and market and competition law, and how the rules interact and influence the relation between the actors of the market and their scope for action,
- demonstrate skills in law interpretation and legal case analysis concerning the above mentioned legal fields,
- identify, analyse and solve practical legal problems in the stated legal fields both in groups and individually,
- both orally in writing, communicate and argue for advocated solutions,
- integrate previously mentioned rules with one another,
- reflect on conclusions of results from both interpretation of the law and case analysis as adjudication,
- reflect on the interplay of said rules.

## Course content

Immaterial resources constitute an increasingly larger part of the value building process in enterprise, and an increasingly more important competitive weapon. This course includes studies of both the intellectual property law rules, and competition law and market law rules and the interplay between the rules in a market economy.

The course begins with competition law regulation, which above all means regulations intended to maintain open competition. Apart from the historical background, the course includes studies particularly of the central rules concerning the prohibition against restrictive cooperation between companies, abuse of dominating positions and company concentrations. After that, the course is focused on an overview of the systematics and legal sources of the Swedish and European intellectual property rights. This part is followed by the different sole rights, such as copyright, patent law, design law, trademark law and company law. Finally, the regulatory system that applies in marketing situations is covered.

## Teaching and working methods

Teaching takes the form of lectures, seminars and practical exercises. Compulsory written assignments, to be solved in groups and/or individual, may occur. The student is also expected to study independently, individually or in groups.

## Examination

The course is examined in part through fulfilment of seminars, in part through written independent examination. If written assignments occur, they are included in the examination.

Students failing an exam covering either the entire course or part of the course twice are entitled to have a new examiner appointed for the reexamination.

Students who have passed an examination may not retake it in order to improve their grades.

## Grades

Three-grade scale, U, G, VG

## Other information

Planning and implementation of a course must take its starting point in the wording of the syllabus. The course evaluation included in each course must therefore take up the question how well the course agrees with the syllabus.

The course is carried out in such a way that both men's and women's experience and knowledge is made visible and developed.
