

Coastal Management

Single subject and programme course

credits

Coastal Management

HIND03

Valid from:

Determined by

The Quality Board at the Faculty of Arts
and Sciences

Date determined

1998-11-11

Main field of study

No main field of study

Course level

First cycle

Entry requirements

Two years of undergraduate studies, one of which must be in relevant disciplines or programmes. Documented knowledge of English equivalent to "Engelska B" is required, or an international proficiency test, e.g. TOEFL, minimum score 550/213.

Intended learning outcomes

The aim of the course is identification, analysis and application of problem solutions on coastal management problems.

Course content

The coastal zones belong to the areas under the highest exploitation pressure in the world. The coastal zone is also an important ecological interface with high attraction values for many natural species and human activities. 50 per cent of the world population live in the coastal zone, 80 per cent of the aquatic biomass is produced in the coastal seas. Increased pressure comes from urban development, harbour terminals, the offshore industry, boating, sports, leisure homes, aquaculture, landfills and waste deposition. The empirical examples are related to the Baltic Sea and its tributary areas. The teaching consists of lectures, seminars, field studies and excursions related to the Baltic.

Teaching and working methods

Lectures, seminars, laboratories and excursions.

Examination

Oral and written examination, and term papers.

Grades

Three-grade scale, U, G, VG

Other information

Planning and implementation of a course must take its starting point in the wording of the syllabus. The course evaluation included in each course must therefore take up the question how well the course agrees with the syllabus. The course is carried out in such a way that both men's and women's experience and knowledge is made visible and developed.
