

# Big Data Analytics

Programme course

6 credits

Big Data Analytics

TDDE31

Valid from: 2018 Spring semester

**Determined by**

Board of Studies for Computer Science  
and Media Technology

**Date determined**

## Main field of study

Information Technology, Computer Science and Engineering, Computer Science

## Course level

Second cycle

## Advancement level

A1X

## Course offered for

- Computer Science and Engineering, M Sc in Engineering
- Information Technology, M Sc in Engineering
- Computer Science and Software Engineering, M Sc in Engineering
- Computer Science, Master's Programme

## Prerequisites

Basic database course. Data mining or machine learning course.

## Intended learning outcomes

After completed course, the student should on an advanced level be able to:

- collect and store Big Data in a distributed computer environment
- perform basic queries to a database operating on a distributed file system
- account for basic principles of parallel computations
- use the MapReduce concept to parallelize common data processing algorithms
- be able to modify standard machine learning models in order to process Big Data
- use tools for machine learning for Big Data

## Course content

The course introduces main concepts and tools for storing, processing and analyzing Big Data which are necessary for professional work and research in data analytics.

- Introduction to Big Data: concepts and tools
- Basic principles of parallel computing
- File systems and databases for Big Data
- Querying for Big Data
- Resource management in a cluster environment
- Parallelizing computations for Big Data
- Machine Learning for Big Data

## Teaching and working methods

The teaching comprises lectures and computer exercises.

Lectures are devoted to presentations of theories, concepts and methods.

Computer exercises provide practical experience of manipulation with Big Data.

## Examination

LAB1	Labs	3 credits	U, G
TEN1	Written exam	3 credits	U, 3, 4, 5

## Grades

Four-grade scale, LiU, U, 3, 4, 5

## Other information

Related courses: advanced data models and databases, parallel programming, multicore programming.

## Department

Institutionen för datavetenskap

## Director of Studies or equivalent

Patrick Lambrix

## Examiner

Patrick Lambrix

## Education components

Preliminary scheduled hours: 40 h

Recommended self-study hours: 120 h

## Course literature
