

Engineering Materials and Manufacturing Technology

Material och tillverkningsteknik
6 credits

Programme course

TMKO02

Valid from: 2026 Spring semester

Determined by	Main field of study	
Board of Studies for Mechanical Engineering and Design	Mechanical Engineering	
Date determined	Course level	Progressive specialisation
2025-08-28	Second cycle	A1N
Revised by	Disciplinary domain	
	Technology	
Revision date	Subject group	
	Mechanical Engineering	
Offered first time	Offered for the last time	
Autumn semester 2020		
Department	Replaced by	
Institutionen för ekonomisk och industriell utveckling		

Course offered for

- Master of Science in Mechanical Engineering
- Master of Science in Design and Product Development
- Master's Programme in Mechanical Engineering

Prerequisites

Basic courses in Engineering materials and Solid mechanics.

Intended learning outcomes

After completed course the student should be able to:

- Account for the interaction between manufacturing process, process parameters and the resulting microstructure using advanced theory.
- Analyse, evaluate, select, and optimise geometrical shape, manufacturing process and process parameters based on their influence on the material properties.
- Perform, evaluate, document, analyse and draw conclusions from metallography to understand the coupling between inner structure, manufacturing process and material properties.

Course content

- Material aspects on industrial manufacturing processes, like casting, welding, metal forming, forging, metal cutting, and additive manufacturing.
- Phase diagrams and alloy theory
- Solidification and diffusion
- Work-hardening and annealing
- Steel transformations
- Precipitation hardening
- Microstructure and properties of the most common groups of metallic materials; Steel, Cast iron, Aluminium, Titan- and Nickel-based alloys
- Heat treatments and surface treatments

Teaching and working methods

The course consist of lectures, tutorials, laboratory work and home assignments.

Examination

UPG1	Seminar	1 credits	U, G
LAB1	Laboration course	1 credits	U, G
TEN1	Written examination	4 credits	U, 3, 4, 5

Grades for examination modules are decided in accordance with the assessment criteria presented at the start of the course.

Grades

Four-grade scale, LiU, U, 3, 4, 5

Other information

About teaching and examination language

The teaching language is presented in the Overview tab for each course. The examination language relates to the teaching language as follows:

- If teaching language is “Swedish”, the course as a whole could be given in Swedish, or partly in English. Examination language is Swedish, but parts of the examination can be in English.
- If teaching language is “English”, the course as a whole is taught in English. Examination language is English.
- If teaching language is “Swedish/English”, the course as a whole will be taught in English if students without prior knowledge of the Swedish language participate. Examination language is Swedish or English depending on teaching language.

Other

The course is conducted in such a way that there are equal opportunities with regard to sex, transgender identity or expression, ethnicity, religion or other belief, disability, sexual orientation and age.

The planning and implementation of a course should correspond to the course syllabus. The course evaluation should therefore be conducted with the course syllabus as a starting point.

The course is campus-based at the location specified for the course, unless otherwise stated under “Teaching and working methods”. Please note, in a campus-based course occasional remote sessions could be included.
